M-audio fast track guitar mic recording interface driver

[Archived Messages] [The New MidiWorld Forum] The current format of the MIDI Forum is outdated, so it's time to start a new, better one. Spammers are giving me a lot of trouble, I spend way too much time cleaning up after them. The new format will eliminate most of the unwanted posts, and also provide a much better interface for users. The old forum will still be available for browsing and searching, there is a lot of useful info here. New posts will be redirected to the new forum. I'm also moving the QuadraSynth Forum and the Synthman Forum to the same location, so you'll find everything in one place. I believe this will be a much needed improvement. Please email me your feedback and suggestions. Thank you.
